

Safecoat Caulk & Adhesive

We offer the most comprehensive collection of high quality, high-performance solutions available to preserve your health and protect your home or building from harsh or dangerous toxins and chemicals.

Caulking Compound

Safecoat Caulking Compound is a non-toxic, water-based, elastic emulsion-type caulking compound designed to replace oil caulk and putty for windows, cracks and general maintenance work. It will not dry out or crack and does not release any solvents or obnoxious odors. Safecoat Caulking Compound provides a water resistant, flexible, easy to install, non-sag sealant with excellent initial and permanent adhesion. As a ready-to-use, pigmented elastomer, Safecoat Caulking Compound has thixotropic properties which enable the application to be made with ease with no stringiness and yet maintains flexibility and toughness with rapid drying characteristics. It may be applied to a variety of substrates and has high durability. Resin-rich formula affords maximum bond strength.

3 in 1 Adhesive

Safecoat 3 in 1 Adhesive is a low odor, non-toxic, water-based adhesive designed for hard composition wall and floor tiles and carpeting.
