

Safecoat Wood Floor, Furniture & Cabinet Stains & Finishes

This collection provides the perfect finishing touch for surfaces that include wooden floors, cabinetry, doors, paneling, furniture and display fixtures. These hard, durable coatings feature excellent resistance to stains and marring, while they offer a healthy alternative to solvents, toxins and harsh odors in conventional lacquers and polyurethane finishes. These unique finishing products safeguard your health while they ensure beautiful, long-lasting surfaces for your home. Available in gloss, satin and matte finishes.

DuroStain SCS CERTIFIED - LEED QUALIFIED

This premium quality, fast-curing flat finish, water-based semi-transparent stain is ideal for interior and exterior wood surfaces. It promotes penetration of porous surfaces and has high adhesion for superior protection as a decorative colorant. It has excellent pigmentation stability and is a durable stain. It contains no aniline dyestuffs, no gilsonite or asphalt, no aromatic solvents and no formaldehyde. Use on all wood surfaces.

Acrylacq SCS CERTIFIED - LEED QUALIFIED

Safecoat Acrylacq is a clear, high-gloss, water-based replacement for high solvent content lacquer. It is hard and durable with superior resistance to stains, marring and fingerprint marks. Also available in satin.

Polyureseal BP SCS CERTIFIED - LEED QUALIFIED

The highest quality water-based clear gloss finish available today. Its exceptional durability and abrasion resistance, coupled with high solids, very low odor, and very low VOC, make it the clear alternative to conventional solvent and water-based polyurethanes. Also available in satin.

Trim and Door Enamel SCS CERTIFIED - LEED QUALIFIED

A unique, highly durable coating for high-abuse areas such as trim, baseboards, chair rails and doors. Available in eggshell and semi-gloss finishes. Safecoat is fully tintable using zero VOC tints.

Transitional Primer SCS CERTIFIED - LEED QUALIFIED

Safecoat Transitional Primer is a premium quality, water-based, flat-finish universal primer specifically formulated to solve difficult application problems without the use of toxic and malodorous chemicals. Because it has an extremely tight and efficient polymer network, when properly applied it is particularly well suited for transitioning from existing oil-based painted surfaces to water-based coatings. When properly applied, it is useful as a stain blocker for many of the knot holes, water soluble stains and oils, tannins and terpenes in wood which can "bleed through" to the surface upon the application of traditional water-based primers. Like all Safecoat paints, it is the least toxic product of its type, and contains no naphtha or other aromatic solvents, and no formaldehyde, ethylene glycol, ammonia, acetone, heavy metals, crystalline silica or other carcinogenic or hazardous materials. Safecoat Transitional Primer is naturally low in odor, and unlike other paints contains no masking agents or fragrances to hide the smells of toxic chemicals.
